

IN THE CLAIMS

*Please amend claims as follows:*

1. (Canceled).
2. (Currently amended) A process for ink jet printing on a cloth using ultraviolet ray curable ink, which comprises the steps of  
forming a three-dimensional pattern on the cloth by repeating the step of applying a transparent ultraviolet ray curable ink and then curing by ultraviolet rays; and  
applying an ultraviolet ray curable ink containing a coloring component on the three-dimensional pattern to form a three-dimensional image,  
wherein said transparent ultraviolet ray curable ink and said ultraviolet ray curable ink containing a coloring component comprises a reactive oligomer, a reactive diluent and a photoinitiator;  
said reactive oligomer being contained in an amount of 1 to 70% by weight in said transparent ultraviolet ray curable ink and in an amount of 1 to 60% by weight in said ultraviolet ray curable ink containing a coloring component.
3. (Canceled)
4. (Previously presented) The process for ink jet printing of claim 2, wherein said transparent ultraviolet ray curable ink and said ultraviolet ray curable ink containing a coloring component are heated by a heating means and then discharged.
- 5-6. (Canceled)
